

CLEAN BOATS CLEAN WATERS

CLEAN BOATS CLEAN WATERS

Help protect Adirondack waters from aquatic invasive species: always Clean, Drain and Dry!

New inspection and decontamination stations across the Adirondacks make it easier than ever to ensure that your boat is Clean, Drained and Dry. The program is voluntary and free of charge to boaters, thanks to funding from partners and New York State's Environmental Protection Fund.

AQUATIC INVADERS TO LOOK OUT FOR

Aquatic invasive species are non-native plants and animals that threaten native plants, wildlife and their habitat. They also degrade boating and fishing opportunities and reduce lakeshore property values and tourism. Once they are established, eradication is almost impossible. Hitchhiking on watercraft is one of the main ways that aquatic invasive species are moved from lake to lake.

Hydrilla

D. Moorhead, R. Vidéki, Bugwood.org

Quagga/Zebra Mussel

J.E. Marsden, UVM & D. Jude

Spiny Water Flea

DFWI & J. Gunderson, MN Sea Grant

WHEN YOU LEAVE A WATERWAY

CLEAN and remove all visible plants, animals, fish, and mud from your boat, trailer and equipment and dispose of in a trash container or on dry land.

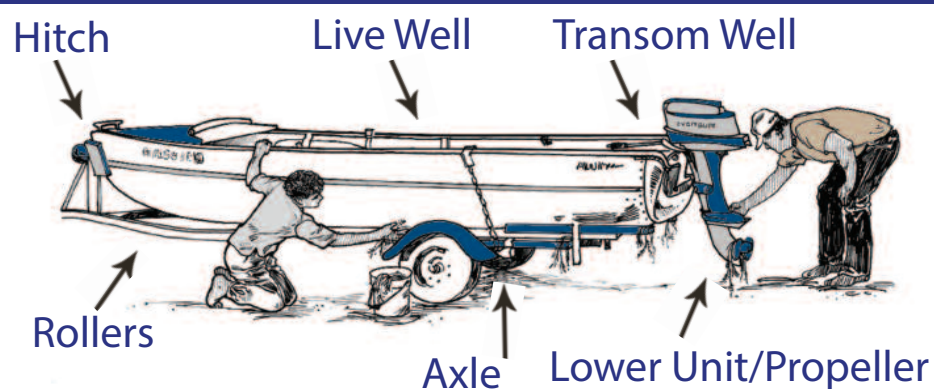

DRAIN water from bilge, live wells, ballast tanks, and other locations before leaving the launch.

DRY your boat, trailer, and equipment completely, at least five days. Drying times vary depending on weather and type of material.
